SAFe CoFund

It's participatory budgeting, simplified.

Introducing a powerful application that lets you inform value stream funding collaboratively.

Better investment decisions start here

Determine value stream funding allocation

Ensure your portfolio stays balanced with guardrails

Run scenarios for better visualization and decisions

Involve more people across the organization

Simple, flexible setup and management for configurable events

Real-time voting and bidding

Reduced burden on coaches and facilitators

Integrated into SAFe Studio

Gain the confidence to facilitate participatory budgeting and prioritize investments together.

Participatory budgeting is a high-stakes event requiring collaboration across the portfolio to:

- Achieve business outcomes by focusing on the right investments
- Align stakeholders across the value streams and groups
- Ensure voting results stay in balance with portfolio guardrails

CoFund solves these issues by enabling enterprises to visualize important connections to inform the funding decisions.

Easy to set up

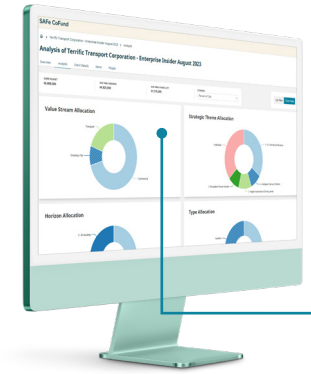
Set up new items in minutes, instantly import and populate existing data, and quickly add new participants.

Easy to facilitate

Visualize the real-time impact of bidding activity, update parameters, and provide targeted coaching throughout the event.

Easy to participate

Use advanced search features to locate items, place bids, see how others are bidding, and gauge the impact of your decisions.



CoFund uses a variety of dashboards and dynamic visuals to guide you through the participatory budgeting process.

See examples of the application and key features.

Work Differently.
Build the Future.

Balance your portfolio investments and fuel enterprise agility with an easy-to-use application.

Easy to facilitate

1 Real-time facilitation monitoring and bidding scenarios

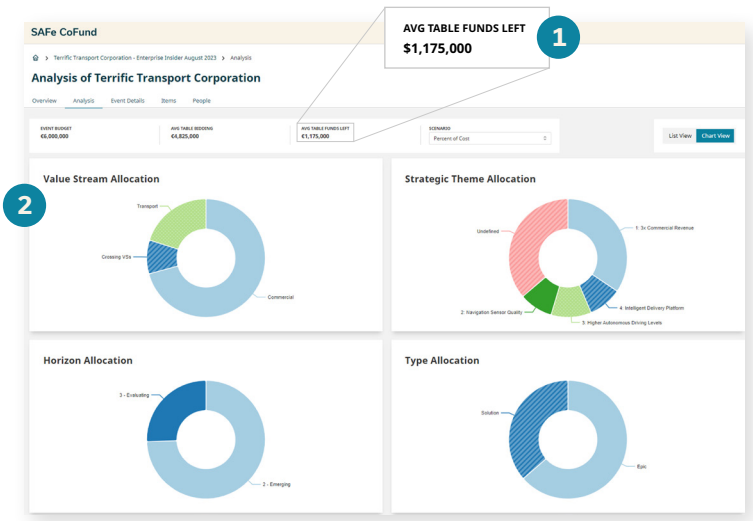
See bidding progress and adjust scenarios based on organizational outcomes.

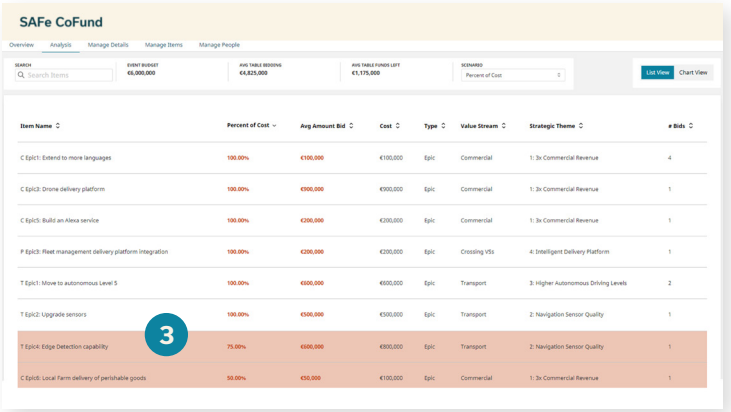
2 Connect value streams, strategic themes, and horizons

Easily incorporate core LPM elements into your decision-making and visualize the impact.

3 Understand the budget cut line

Get a clear and immediate view of what items will not be fully funded based on current bidding decisions.





Easy to participate

4 Quickly locate and bid on items

Search by any term or sort by a variety of parameters to locate the item and place your bid in one click.

5 See how others are bidding

Get real-time updates on how your table is bidding to help guide your decisions.
